Bootstrap v5.0 ▼

Documentation and examples for displaying related images and text with the figure component in Bootstrap.

Anytime you need to display a piece of content—like an image with an optional caption, consider using a <figure>.

Use the included .figure, .figure-img and .figure-caption classes to provide some baseline styles for the HTML5 <figure> and <figcaption> elements. Images in figures have no explicit size, so be sure to add the .img-fluid class to your to make it responsive.

Aligning the figure's caption is easy with our text utilities.

Variables

\$figure-caption-font-size: \$small-font-size;
\$figure-caption-color: \$gray-600;

Designed and built with all the love in the world by the Bootstrap team with the help of our contributors.

Code licensed MIT, docs CC BY 3.0.

Currently v5.0.2.
