Download

View on GitHub

Download Bootstrap to get the compiled CSS and JavaScript, source code, or include it with your favorite package managers like npm, RubyGems, and more.

Compiled CSS and JS

Download ready-to-use compiled code for **Bootstrap v5.0.2** to easily drop into your project, which includes:

- Compiled and minified CSS bundles (see CSS files comparison)
- Compiled and minified JavaScript plugins (see JS files comparison)

This doesn't include documentation, source files, or any optional JavaScript dependencies like Popper.

Download

Source files

Compile Bootstrap with your own asset pipeline by downloading our source Sass, JavaScript, and documentation files. This option requires some additional tooling:

- Sass compiler for compiling Sass source files into CSS files
- Autoprefixer for CSS vendor prefixing

Should you require our full set of build tools, they are included for developing Bootstrap and its docs, but they're likely unsuitable for your own purposes.

Download source

Examples

If you want to download and examine our examples, you can grab the already built examples:

Download Examples

CDN via jsDelivr

Skip the download with jsDelivr to deliver cached version of Bootstrap's compiled CSS and JS to your project.

```
<link href="https://cdn.jsdelivr.net/npm/bootstrap@5.0.2/dist/css/bootstrap.min.css" rel="stylesheet
<script src="https://cdn.jsdelivr.net/npm/bootstrap@5.0.2/dist/js/bootstrap.bundle.min.js" integrity=":
```
Copy

If you're using our compiled JavaScript and prefer to include Popper separately, add Popper before our JS, via a CDN preferably.

```
<script src="https://cdn.jsdelivr.net/npm/@popperjs/core@2.9.2/dist/umd/popper.min.js" integrity="sha3:
<script src="https://cdn.jsdelivr.net/npm/bootstrap@5.0.2/dist/js/bootstrap.min.js" integrity="sha384-:
```
Copy

Package managers

Pull in Bootstrap's **source files** into nearly any project with some of the most popular package managers. No matter

the package manager, Bootstrap will **require a Sass compiler and Autoprefixer** for a setup that matches our official compiled versions.

npm

Install Bootstrap in your Node.js powered apps with the npm package:

```
$ npm install bootstrap
```
Copy

`const bootstrap = require('bootstrap')` or `import bootstrap from 'bootstrap'` will load all of Bootstrap's plugins onto a `bootstrap` object. The `bootstrap` module itself exports all of our plugins. You can manually load Bootstrap's plugins individually by loading the `/js/dist/*.js` files under the package's top-level directory.

Bootstrap's `package.json` contains some additional metadata under the following keys:

- `sass` - path to Bootstrap's main Sass source file
- `style` - path to Bootstrap's non-minified CSS that's been precompiled using the default settings (no customization)

> **Get started with Bootstrap via npm with our starter project!** Head to the twbs/bootstrap-npm-starter template repository to see how to build and customize Bootstrap in your own npm project. Includes Sass compiler, Autoprefixer, Stylelint, PurgeCSS, and Bootstrap Icons.

yarn

Install Bootstrap in your Node.js powered apps with the yarn package:

```
$ yarn add bootstrap
```
Copy

RubyGems

Install Bootstrap in your Ruby apps using Bundler (**recommended**) and RubyGems by adding the following line to your Gemfile:

```
gem 'bootstrap', '~> 5.0.2'
```
Copy

Alternatively, if you're not using Bundler, you can install the gem by running this command:

```
$ gem install bootstrap -v 5.0.2
```
Copy

See the gem's README for further details.

Composer

You can also install and manage Bootstrap's Sass and JavaScript using Composer:

```
$ composer require twbs/bootstrap:5.0.2
```
Copy

NuGet

If you develop in .NET, you can also install and manage Bootstrap's CSS or Sass and JavaScript using NuGet:

```
PM> Install-Package bootstrap
```
Copy

```
PM> Install-Package bootstrap.sass
```
Copy

Bootstrap

Designed and built with all the love in the
world by the Bootstrap team with the help
of our contributors.

Code licensed MIT, docs CC BY 3.0.

Currently v5.0.2.
